P. - W.'S LAWN MIXTURES

PREFERRED FOR WESTERN LAWNS

VELVET LAWN MIXTURE

There is no finer lawn seed at any price than our Velvet Lawn Mixture. For Intermountain soils and climate it is most dependable. The addition of Creeping Red Fescue, gives this mixture greater tolerance to sandy soils and heavy shade. Velvet Lawn makes a smooth, fine textured, deep green turf which is easily maintained and permanently beautiful. Blended from high quality Kentucky Blue Grass, White Dutch Clover and Creeping Red Fescue, every seed in Velvet Lawn Mixture makes a desirable plant in your lawn.

EVERGREEN LAWN MIXTURE

Evergreen Lawn Mix is a blend of three hardy, dependable grasses with White Dutch Clover, all admirably adapted to Intermountain soil and climate. It produces a very durable sod, ideal for carpeting your outdoor living room, play area or front yard. It recovers quickly from the tramping of outdoor games and parties. Alkaline soils do not hinder its growth as they do with most other lawn grasses. Evergreen Lawn Mix combines both economy and rugged dependability to give you an excellent all purpose lawn.

SHADY NOOK MIXTURE

Shady Nook Mixture is a blend of shade tolerant grasses selected for their excellent performance in the Intermountain States. Shady Nook blend has been used for many years and is the most widely accepted grass mixture for planting under trees or in the shade of buildings.

ATHLETIC FIELD MIXTURE

The tough wear resistant grasses in this mixture are ideally suited for athletic fields and playgrounds. Schools, parks and commercial amusement places have planted hundreds of acres of this hardy, firm sodded mixture.

KENTUCKY BLUE GRASS

The fine texture, rich green color, extra vigor and universal adaptability makes Kentucky Blue an outstanding lawn grass to plant alone.

CREEPING RED FESCUE

If you would have a lustrous deep green lawn all year long plant Red Fescue. This beautiful fine textured wear resistant, drought resistant grass thrives on all soils from sand to clay — acid or alkaline. It is the very best grass for shaded areas.

WHITE DUTCH CLOVER

It is the best Clover to include in grass mixture. Advantages are that it grows quickly, remains green all season and is helpful to grasses growing with it. Gardeners who prefer heavy clover growth should include 2 oz. to each pound of grass seed.

MERION BLUE GRASS NEW "MAGIC CARPET" LAWN THAT REQUIRES LESS MOWING — Lets You Take It Easy!

Merion Blue Grass is a new strain of grass that is coming to the rescue of busy gardeners. Because of its slow growing habit, Merion Blue requires only half as much mowing as ordinary Kentucky Blue grass. Other important advantages include a lower water requirement, deep green color, fine texture and a vigorous spreading root system that quickly replaces any scuffed off spots. Merion Blue grass seed germinates slowly — grows slowly — so requires a few weeks longer to develop a firm sod. But, this very feature will pay off with extra leisure hours year after year for the life of your lawn.

Porter-Walton's Pure Merion Blue Grass is not mixed with common faster growing varieties which would cancel all of the time and money saving advantages offered by this wonderful new grass.

PORTER - WALTON'S FARM SEEDS

ALFALFA (Lucerne) Wonder Crop of the West

2578 **Ranger.** This new variety is highly resistant to bacterial wilt. Being very similar to Common or Hardy Desert in habit of growth and soil requirements, it is well adapted to northern areas. In localities where bacterial wilt is a problem, a stand of Ranger will remain indefinitely.

2580 **Grimm.** Especially recommended for shallow soils, those underlaid with hardpan, or where the watertable is near the surface. The stems and leaves are of somewhat finer and leafier quality than Hardy Desert Alfalfa. It is susceptible to bacterial wilt and is not recommended for areas of severe infestation. Extremely winter-hardy.

2590 **Ladak.** Tests at nearly every northern and western Experiment Station show Ladak leading on tonnage, long life, drought-resistance, and winter hardiness. It has also shown marked resistance to bacterial wilt. Because Ladak makes heavy first and second crops but little third, it is especially recommended for high elevations.

2560 **Hardy Desert.** (Utah Common). Very winter hardy and extremely drought resistant because of its long tap root. An exceptionally heavy producer. Sow 10 to 15 pounds per acre.

HYBRID FIELD CORN

Sow in drills 3 feet apart, using approximately 15 pounds of seed per acre.

2502 PORT-WALCO HYBRID No. 100

Top Silage Producer

Maturity 100 to 110 days. Since its introduction growers in most areas have reported heaviest tonnage per acre in both green fodder and dry weight with Port-Walco Hybrid 100. It is a prodigious yielder of good solid ears that are long and thick, with very little taper. A strong and vigorous grower, producing tall, succulent stalks. Then too, the ears are set at a good height so there is little or no stalk breakage.

2505 PORT-WALCO HYBRID No. 90

Best of the 90 to 100-day maturity Corns. The dark green plants of this high-yielding early hybrid retain their rich color even after the ears are well matured. This condition makes possible a feed of greater nutritive value. The ears are medium size and thick with deep kernels. In U.S.A.C. tests at various Utah stations Port-Walco No. 90 was one of the highest-yielding varieties.

2507 PORT-WALCO HYBRID No. 120

The outstanding silage variety, maturing in 110 to 120 days. Not only is it the heaviest fodder producer in our hybrid list, but it yields an equally good grain crop. Its short shanks permit easy harvesting and handling for silage purposes. The plants of No. 120 are rich dark green, retaining their color until after the ears are well matured. As silage, it possesses both higher food value and higher palatability.

OPEN-POLLINATED CORN

2512 MINNESOTA No. 13

The leading all-round, open-pollinated variety. A 90-day dent Corn, acclimated to this area. It is the heaviest producer of the medium-early varieties. Plants grow 7 to 8 feet tall, bearing ears 9 to 10 inches long. Makes splendid ensilage.

CLOVER FOR MEADOWS AND PASTURES

2600 **Alsike.** Recommended for hay crops sown by itself or with timothy or Red Clovers. The use of Alsike Clover is increasing rapidly; cattle prefer it to other varieties. Sow at the rate of 6 or 8 pounds per acre; sown in mixtures, 3 to 4 pounds per acre is sufficient. Very winter hardy. **Does best on damp soils.** Used in pasture mixture with grasses.

2620 **Ladino.** A giant form of the common White Dutch Clover and like the latter is a long-lived perennial. After being grazed, new leaves develop quickly, complete recovery occurring in 17 to 28 days. It is strictly a crop for irrigation. Sow in early fall or spring at the rate of 3 to 5 pounds per acre, 1 to 2 pounds in mixtures.

2630 **Medium Red.** (*Trifolium pratense*). A dependable, all-around variety for farmers and stockmen. It makes two hay crops each year. Sow in either spring or early fall at the rate of 15 pounds to the acre. It is good in pastures with grasses as a companion crop.

2640 **Strawberry** (Tall Variety). Resembles the Common White Dutch in appearance but is much hardier and adapted to a wider range of soil and moisture conditions.

Will thrive in soils having a high alkaline content and will survive flooding for a period of 30 to 60 days. Highly recommended as a pasture crop because of palatability and hardiness.

SWEET CLOVER

2610 **Hubam.** The richest honey-producing Clover. An annual sweet Clover which grows rapidly, attaining a height of 6 to 7 feet. It is very valuable for pasturage and hay when cut before it gets too old. Also used to great advantage as a cover crop or for green manure. Sow 12 to 15 pounds per acre in fall or spring.

2660 **White Blossom** (*Melilotus alba*). Its value in the redemption of alkali lands cannot be overestimated. It grows in a variety of soils—heavy, light, wet or dry, almost anywhere except in acid soil. Sow 15 to 20 pounds per acre.

2666 **Yellow Blossom** (*Melilotus officinalis*). Finer in the stalk and more palatable when mature than White Blossom, and has the same soil adaptation. Its refinement of stock and palatability make it a good pasture or hay crop.

FIELD SEED PRICES

Prices on all field seeds are quoted on page 13.

Since the market changes rapidly on Field Seeds, the prices quoted herein are subject to change without notice. All quotations are f.o.b. Salt Lake City, Utah.

About Prices

From time to time we will be sending our customers special FIELD SEED LISTS to correct changes in market prices. If you are not receiving them, please inform us.

P.-W.'s PASTURE MIXTURES

Formulated for HIGHER PALATABILITY

MAINTAINED PRODUCTIVITY • WIDE SOIL ADAPTABILITY

2670 **Mixture A.** For well-drained irrigated land, or damp fertile soil.

Ladino	1 lb.
Red Clover	3 lbs.
Alfalfa, Ranger	3 lbs.
Tall Meadow Oat, Tualatin Groated	3 lbs.
Orchard Grass	5 lbs.
Smooth Brome	4 lbs.
Total per acre	19 lbs.

2676 **Mixture B.** For alkaline and wet soils.

Alsike	3 lbs.
Strawberry Clover	1 lb.
Sweet Yellow Clover	3 lbs.
Reed Canary Grass	3 lbs.
Alta Fescue	4 lbs.
Smooth Brome	4 lbs.
Total per acre	18 lbs.

AFRAID OF BLOAT?

Bloat, the long-feared killer of thousands of cattle, can usually be prevented by observing these pasture rules:

- (1) Plant a properly balanced pasture mix formula. Legumes are necessary for highest production, and they are relatively safe provided they do not exceed 60 per cent of the forage.
- (2) Wait until legumes have reached the bud stage before pasturing.
- (3) Practice restricted grazing. Animals allowed to range over too wide an area will select the most succulent legume plants which cause the bloat.
- (4) Make certain that animals are not hungry when turned into a new pasture.

GRASS for Range, Meadow, Pasture

2700 MOUNTAIN BROME GRASS (*Bromus marginatus*)

This stout perennial bunch grass is very common in altitudes of 5,000 to 10,000 feet. It has a very wide range of soil adaptation, varying from fairly loamy soils where the best growth is made, to fairly dry, gravelly soils. Mountain Brome Grass, when young, is grazed closely by all kinds of livestock. Where it can be cut for hay, it makes a very fine feed for horses and cattle.

It is an exceptional grass for the reclamation of land inaccessible to farm machinery, for good stands may be obtained by broadcasting on areas where seedbed preparation is not possible. Sow 10 to 20 pounds per acre.

2740 MEADOW FESCUE

Very productive of bright green leaves, supplying forage from early spring until late fall. Well suited to alkaline soils. Sow 20 to 30 pounds per acre.

2710 SMOOTH BROME GRASS (*Bromus inermis*)

Smooth Brome is one of the outstanding grasses for the Intermountain area, being well adapted to arid regions where rainfall is relatively low. It is the most palatable of all the important grasses, surpassing even the well-known Kentucky Blue Grass in this respect. Smooth Brome is a long-lived perennial with numerous creeping rootstalks that form a dense heavy sod, making it capable of standing much abuse as a pasture grass. Brome thrives especially well on a rich loamy soil; but in the wild state it grows in dry, gravelly soils, or even in pure sand. Recent experiments have shown it to succeed in alkaline soils.

The stems attain a height of 2 to 3 feet. Two cuttings of hay are generally obtained in a season, yields ranging from 1 to 4 tons per acre. Sow 15 to 20 pounds per acre on irrigated land or 8 to 10 pounds per acre on dry land. Drilling is preferable to broadcasting wherever possible.

2750 ORCHARD GRASS (*Dactylis glomerata*)

This very early pasture grass furnishes feed at least three weeks before most other grasses. Even after close grazing, a ten-day interval is sufficient for another growth. It makes a heavy sod and gives splendid pasture until late in the fall. Withstands drought and is very hardy. An excellent variety for use in pasture mixtures. Sow 15 to 20 pounds per acre when seeded alone.

2760 PERENNIAL RYE GRASS

Adapted for plantings on alkaline soils. Used as an ingredient in hardy lawn mixtures. Sow 15 to 25 pounds per acre.

2788 INTERMEDIATE WHEAT GRASS

This hardy perennial sod-forming grass begins growth early in the spring and will reach a height of 3 or 4 feet before growth ceases in midsummer due to lack of moisture. Good growth recovery is made in late summer or early fall with the return of moisture and cool temperatures. The abundant forage is relished by all classes of livestock in all stages of growth, comparing favorably in this respect with Smooth Brome. Intermediate Wheat in the Intermountain area is well adapted to range lands under 9,000 feet that receive in excess of 12 inches of annual rainfall. It is slightly more drought resistant than Smooth Brome, but less hardy and drought resistant than Crested Wheat. It is a high producer and well adapted on range land supporting oakbrush, serviceberry, and in open aspen areas.

Excellent seedling vigor permits relatively low seeding rates of from 6 to 10 pounds per acre, which can be made in early spring or late fall.

GRASS FOR RANGE, MEADOW, PASTURE, continued

2793 TALL WHEAT GRASS

(*Agropyron elongatum*)

Tall Wheat Grass was found by plant explorers in the early 1930's growing in salt marshes in northern Turkey. It is somewhat coarse, erect perennial with a bunch-type growth. An abundance of long basal and stem leaves makes it a high forage producer comparing favorably with other Wheat grass varieties. The mature plant is tall, often reaching a height of 5 feet and even more under irrigation.

The outstanding advantage of Tall Wheat Grass is its tolerance of wet alkaline conditions. This grass has produced high yields on land that has been considered worthless for cash crops. It stands up well under both cold and drought conditions.

Unlike Intermediate Wheat and Crested Wheat grasses which become dormant at the beginning of summer, Tall Wheat Grass continues growth as long as any moisture is available. Although Crested Wheat is hardier than Tall Wheat the latter variety excels as forage producer during hot weather and on alkaline soils.

Fall plantings on a well-packed seed bed drilled at from $\frac{1}{2}$ to $\frac{3}{4}$ inch in depth have generally given the best results. Seeding rate is 6 to 10 pounds per acre.

2780 CRESTED WHEAT GRASS

(*Agropyron cristatum*)

This wonderful ranch and range grass grows earlier in the spring and later in the fall because of its ability to grow at low temperatures. As a hay crop it is very nutritious and palatable and stands well under grazing. It has made a most remarkable showing under arid conditions, succeeding where other varieties fail. Crested Wheat is a long-lived grass. It is relished by livestock and adapts itself to a wide range of soils. Sow 8 to 10 pounds per acre.

2735 ALTA FESCUE

(*Festuca elatior arundinacea*)

Alta Fescue is an outstanding grass of recent development for both pasture and hay purposes. It is much more productive than Meadow Fescue. It grows late in the summer and fall when other grasses have passed their productive peak. Various trials show it to outyield other varieties from 15 to 50 per cent. The dense root system, reaching a depth of 5 to 6 feet, makes this variety valuable as a soil builder where the humus content is low. It also crowds out undesirable weed growth. Sow 12 to 15 pounds per acre.

2840 REED CANARY GRASS

(*Phalaris arundinacea*)

This is a valuable, high-yielding forage plant that is naturally adapted to low wet lands. Two or three crops of high quality hay may be cut or it will provide excellent all summer pasture. Sow at the rate of 5 to 6 pounds per acre broadcast or in drills, or 2 to 3 pounds per acre in 16 to 18-inch rows.

2934 SUDAN GRASS (Common)

Drill 15 to 20 pounds or broadcast 25 pounds per acre for pasture. It will tolerate alkali. Planted in rich soil in June, it will be ready to pasture in 30 days, furnishing grazing for two cows per acre throughout the summer. As a hay crop, it should be cut when heads appear. Allow several days of ideal weather to cure. A second crop may be cut or pastured, as preferred.

2830 RED TOP

A valuable grass for wet and slightly alkaline soils. Sow 15 to 25 pounds per acre.

2935 NEW SWEET SUDAN GRASS

This new variety is sweet, juicy and more palatable to livestock. Sweet Sudan is later in maturity than Common Sudan, thereby producing more vegetative growth and remaining green longer than the Common. After the crop reaches maturity the stalks and stems are still eaten readily. Sweet Sudan has more and broader leaves, heavier and taller stalks, and stools much heavier than Common Sudan.

2850 TALL MEADOW OAT GRASS

Tall Meadow Oat is a deep-rooted, drought-resistant perennial grass. It produces an abundance of very palatable forage from early spring until late fall. Recent pasture grass experiments conducted by U.S.A.C. at Logan prove this grass to be one of the most desirable from the standpoint of productivity and palatability. Tall Meadow Oat Grass gives best results for pasture when sown in a mixture with other grasses and clover.

2851 TUALATIN OAT GRASS

(Groated Seed)

Tualatin Oat Grass possesses the same growth habits, adaptabilities and forage value as Tall Meadow Oat Grass. However, the seed kernel of this new strain has been mechanically removed from the large bulky hull by a process known as groating. The removal of the hull allows trouble-free drilling of the seed and greatly reduces the bulk of seed to be handled.

2860 TIMOTHY

Of hay grasses, Timothy leads all. Thrives on clay or heavy loams, wet or boggy soils, or in mountainous districts. Alone, sow 12 pounds to the acre, or with clover, 10 pounds Timothy and 6 pounds clover.

Other FORAGE and COVER CROPS

MILLET

2894 **Yellow Hog.** Mainly a grain crop but the hay is of a good quality for feeding purposes.

SUNFLOWER

2930 **Grey Stripe.** A good silage crop for dry land. Very palatable and has high food value. Plant 5 to 6 pounds per acre.

DRY-LAND GRAIN SORGHUMS

2920 **60-Day Milo** (Dwarf or Combine Strain). Similar to Kaffir Corn but shorter. Grows erect, with thick, close-jointed stalks 2 to 3 feet tall. The large heads give a heavy yield of grain. It is drought-resistant and does well on alkaline soils.

SWEET SORGHUMS

2928 **Black Amber Cane.** 90 to 110 days. Tall-growing, excellent silage variety. Short supply this year. Ask about prices and availability.

FIELD PEAS

2880 **Canadian Field.** They enrich the soil and are splendid stock feed. For hay, they should be cut while the milk is in the vine forming the pod. Plant early in the spring at the rate of 100 to 120 pounds per acre or 60 pounds with a nurse crop of oats or spring rye.

KOCHIA

2916 **Scoparia.** Grows 4 to 5 feet tall and yields 5 to 7 tons of hay per acre when under irrigation. On alkaline soil it is equally productive. The hay contains 4 to 8 per cent more protein than alfalfa.

Kochia is a drought-resistant forage plant adapted to dry land planting. Sow seed at the rate of 6 pounds per acre on irrigated land or 3 pounds per acre on dry land in late fall or early spring.

VETCH

2940 **Common.** Grown as a hay and seed crop, as well as for green manure, silage, and pasturage. Sow 60 to 80 pounds per acre.

About Prices

All field seed prices are quoted on page 13.

The prices quoted herein are subject to market changes. You are safe, however, in sending remittance according to these prices. In case of decline, the difference will be promptly refunded; if there has been an advance, you will be notified for your confirmation before shipment is made.

ASK FOR P.-W.'s FREE BULLETIN ON FARM AND FORAGE SEEDS. This contains authentic, dependable information on the value and adaptability of the various Farm and Range Clovers and Grasses, together with planting and cultural directions.

8981 MULTIFLORA ROSE

A Permanent Low-Cost Fence. Requires No Maintenance.

Fast Growing. Makes a dense, stock-tight fence in three to five years.

Eliminates Fence Line Weeds.

Does Not Spread. Multiflora Roses do not sucker.

Requires No Maintenance. Eliminates fence repairing costs. Needs no clipping, pruning or training. Just irrigate during the first year to get the new plants established, and keep the weeds down for two years.

Set plants 18 inches apart in fall or early spring.

GLADIOLI

Just before planting, the corms should be dipped for 15 minutes in a solution of Ceresan M (1 ounce to 3 gallons of water). After the plants are 6 inches tall, spray them at 2-week intervals with Isotox Garden Spray or wettable DDT to prevent damage from thrips.

All are No. 1 grade (1½ to 2-inches diameter), clean corms, well grown and free from pests and disease.

PERENNIAL PLANTS

- 6811 **Blue Rythm** — LM 36 in.
Cornflower blue with a silvery overtone. Very large blooms. \$1.00 each
- 6808 **Blue Shimmer** — M 38 in.
Blue markings uniformly covering both standards and falls of enameled ivory white. \$1.00 each 3 for \$2.50
- 6791 **Bryce Canyon** — LM 38 in.
Named for the spectacular scenic canyon whose colors it reproduces. A distinctive warm henna copper. Fragrant. \$1.00 each
- 6827 **Chantilly** — M 36 in.
Orchid pink with deeply crinkled and ruffled edges. \$1.50 each
- 6829 **Cherrie** — EM 34 in.
Cherrie is one of the finest of the new flamingo pinks. It is large and gracefully ruffled with excellent pink color, graceful form and substance. \$5.00 each
- 6813 **Chivalry** — M 36 in.
A Dykes medal winner. Smooth medium blue color large size and beautiful form. \$1.50 each
- 6820 **City of Lincoln** — LM 38 in.
Rich golden standards and bright velvety red falls produce striking color affect. \$1.25 each 3 for \$1.25
- 6854 **Cloth of Gold** — M 38 in.
Brilliant and clear deep golden yellow. Nice flaring form and heavy substance. Fragrant. \$.75 each
- 6871 **Cordovan** — M 30 in.
Very rich brown-red with a glossy finish like a piece of fine textured Cordovan leather. \$1.00 each
- 6881 **Desert Song** — EM 36 in.
Beautiful smooth toned cream with a tinge of butter-scotch. An excellent flower and plant. \$1.50 each
- 6825 **Elmohr** — LM 36 in.
An exquisite shade of rich reddish mulberry, exceptionally glossy and lustrous. \$1.00 each 3 for \$2.50
- 6853 **Fair Elaine** — M 36 in.
Popular Primrose and yellow bitone. \$.40 each 3 for \$1.00
- 6789 **Fire Cracker** — M 33 in.
Vivid burgundy red on yellow ground. One of the most brilliant plicatas. \$1.50 each
- 6843 **Garden Glory** — LM 33 in.
A pure Self of rich Bordeaux-red. It has a classic style, smooth finish and is one of the nearest to true red. \$1.50 each
- 6851 **Golden Majesty** — LM 34 in.
Beautiful golden yellow. \$.40 3 for \$1.00
- 6849 **Grand Canyon** — M 38 in.
As enchanting as the deep plum, copper and gold tones of the scenic canyon for which it was named. \$.75 each 3 for \$2.00
- 6814 **Great Lakes** — M 36 in.
This fine pure light blue Iris holds a permanent place in the Iris Hall of Fame. \$.75 each 3 for \$2.00
- 6815 **Helen McGregor** — EM 36 in.
A clear uniform pale sky blue flower of perfect proportions. Its flaring falls and dainty ruffling give it a serene personality and supreme beauty. Winner of the Dykes medal for 1949. \$2.00 each
- 6824 **Hit Parade** — M 34 in.
A popular flamingo pink with characteristic tangerine beard and some ruffling. \$1.50 each
- 6861 **Lady Mohr** — E 32 in.
A distinctive and interesting descendent of the Wm. Mohr Family. Oyster white standards and pale char-treuse fall make an unusual combination. \$1.00 each
- 6816 **Lela Dixon** — E 34 in.
A new blue plicata of clear color pattern. Well branched, sturdy wind resistant stalks. \$3.00 each
- 6809 **Minnie Colquitt** — EM 34 in.
One of the most strikingly different of the new plicatas. The heart of each petal is white with broad stitching of wine purple. A fine Iris and husky grower. \$1.00 each 3 for \$2.50
- 6869 **Miss California** — EM 40 in.
The tall well branched stalks carry large blooms of lilac-pink. \$.50 each 3 for \$1.25
- 6855 **Moonlight Madonna** — M 36 in.
An exquisite Iris combining crisp texture with the color of clear lemon ice to produce the effect of cool fresh beauty. Ruffled. \$.75 each 3 for \$2.00
- 6830 **Mulberry Rose** — M 40 in.
One of the most unusual new shades in the deep pink class. The large radiant blooms on their tall well branched stems make an imposing clump in the garden. \$.75 each 3 for \$2.00
- 6860 **Ola Kala** — M 36 in.
Deep brilliant yellow with flaring falls, lightly ruffled. Outstanding. \$.75 each 3 for \$2.00
- 6870 **Pink Cameo** — EM 36 in.
Outstanding in its purity of fresh smooth pink color, it rivals higher priced varieties. The rich tangerine beard is its only marking. \$1.50 each
- 6834 **Prairie Sunset** — M 34 in.
A gorgeous giant. Mingled tints of pink, apricot, rose, peach and gold. \$1.00 each 3 for \$2.50
- 6835 **Pretty Quadroon** — L 34 in.
Smooth metallic light copper brown and pale tan with a slight undertone of lavender and gold. Perfect poise and form. One of the best of the popular brown blends. \$6.00 each
- 6905 **Ranger** — L 32 in.
Very popular brilliant crimson red. Large long blooms with firm texture. \$1.50 each
- 6903 **Pricilla** — M 28 in.
Very pure white flower with a lovely personality, enhanced by its honey locust fragrance. \$.75 each
- 6867 **Rocket** — M 36 in.
A vivid, most brilliant orange chrome. Good form and substance. \$1.50 each
- 6826 **Sable** — E 34 in.
Deepest black violet, arresting in its depth of color. Its harmonizing violet beard and its lustrous finish make it a superior Iris in its color. \$.75 each 3 for \$2.00
- 6801 **Snow Flurry** — EM 36 in.
A beautiful ruffled cool white with a tint of blue in the newly opened bloom. Exquisite form. \$1.00 each 3 for \$2.50

PERENNIAL PLANTS

- 6845 **Solid Mahogany** — 36 in.
Highest rated deep red. Heavily textured and smoothly finished. \$1.00 each
- 6797 **Spanish Peaks** — LM 38 in.
Very nicely formed blooms, heavy substance and texture, and all white. One of the best pure whites. \$2.00 each
- 6831 **Spindrift** — M 32 in.
Coral pink with glowing tangerine beard. \$.75 each
- 6857 **Spun Gold** — LM 36 in.
One of the most famous yellow Iris ever grown. The well branched stems carry large flowers of gleaming solid golden yellow. \$.75 each 3 for \$2.00
- 6844 **Sunset Blaze** — EM 40 in.
A magnificent new Iris, well named, its reddish copper blend seems almost red under some lights. \$2.50 each
- 6837 **Sunset Serenade** — M 36 in.
A fascinating blend of apricot buff, somewhat lighter than its parent, Prairie Sunset. A glorious lively toned Iris. \$.75 each 3 for \$2.00
- 6817 **The Admiral** — M 34 in.
Intense, blue, high in brilliance, outstanding in form, finish and substance. Its dramatic character makes it one of the most effective garden Iris. \$.75 each 3 for \$2.00
- 6806 **Tiffanja** — M 38 in.
Smooth, clean-out plicata of buff and cream, sprinkled with light brown around the border of the falls, stylish form and excellent substance. \$.75 each 3 for \$2.00
- 6822 **Wabash** — M 36 in.
White standards and deep violet blue falls edged white. Classic. \$.50 each 3 for \$1.25
- 6848 **William Mohr** — E 28 in.
Large blooms of deep lavender veined with manganese violet. \$.40 each 3 for \$1.00
- 6793 **Winter Carnival** — M 36 in.
One of the most beautiful white Iris. Very large, with widely flaring falls, and a rich gold throat. Excellent branching. \$1.00 each 3 for \$2.50
- 6862 **Zantha** — EM 34 in.
Amazingly large broad petaled flowers on widely branched stems. The color is a gorgeous shade of golden yellow, clear and free of markings. \$2.50 each

1 gal.	1.25
24-30 in.	6.50
30-36 in.	7.90
3-4 ft.	10.00
9486 Globosa — Dense low globe. Handsome shade of green.	
15-18 in.	4.50
18-24 in.	5.90
24-30 in.	6.90
9476 Orientalis Excelsa — Rich green color. Broad conical habit. Rapid grower.	
30-36 in.	6.00
3-4 ft.	8.00
5-6 ft.	12.00
6-7 ft.	13.60

EVERGREENS, continued

	Each
9488 Orientalis Aurea Nana —	
Very dwarf golden tipped, oval shaped.	
1 gal.	1.25
15-18 in.	4.25
18-24 in.	4.75
24-30 in.	6.50

CONIFERS

9494 Austrian Pine —	
Rich green color, long needles.	
30-36 in.	7.90
9498 Mugho Pine —	
Very hardy dense compact growth.	
1 gal.	1.50
12-15 in.	4.25
9502 Spruce Dwarf Alberta —	
This most interesting oddity is a native of the Canadian Rockies. Very slow growing, compact and uniformly pyramidal.	
3 ft.	11.90
9510 Spruce Colorado Green —	
Tall, stately growing evergreen.	
30-36 in.	7.00
3-4 ft.	10.00

BROAD LEAVED EVERGREENS

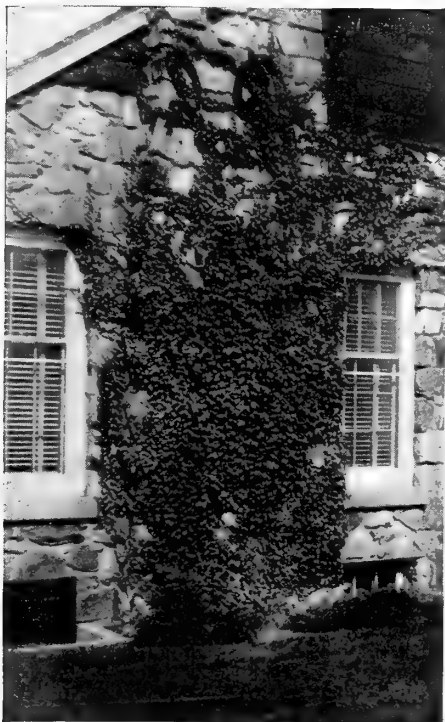

9518 Berberis Sargenti —	
Dark, glossy green spiny-toothed leaves. Upright half-spreading habit.	
1 gal.	1.25
18-24 in.	4.75
2-3 ft.	5.75
9517 Berberis Verruculosa —	
Low dense shrub with small glossy green foliage.	
15-18 in.	4.45
9520 Boxwood Sempervirens —	
Formal habit, glossy dense foliage.	
15-18 in.	4.95
18-24 in.	7.50
24-30 in.	8.50
30-36 in.	9.95
3 1/2 ft.	17.90
9519 Boxwood, True Dwarf —	
Dense, nearly globe shaped plants with small glossy green leaves.	
1 gal.	1.75
12-15 in.	4.95
15-18 in.	5.95
24 in.	10.95
9527 Laurel Portugal —	
Compact dark green hardy.	
24-30 in.	5.95
9531 Laurel Zabeles —	
Fan shaped narrow leaf.	
24-30 in.	5.95
9523 Cotoneaster Apiculata —	
Low spreading habit. Glossy green leaves, pinkish white flowers, large red berries.	
5 gal.	4.95

	Each
9522 Cotoneaster Horizontalis —	
Horizontal habit, small glossy green leaves.	
1 gal.	1.25
9532 Mahonia Compacta —	
Dwarf compact habit. Shiny leaves in changing shades of green.	
1 gal.	1.75
9530 Mahonia Aquifolia —	
Shiny leaves in attractively changing shades of green.	
1 gal.	1.25
15-18 in.	3.30
18-24 in.	4.50
24-30 in.	5.50
30-36 in.	8.95
9528 Euonymus Japonica —	
Shade loving evergreen. Large, glossy green leaves.	
1 gal.	1.25
3 gal.	4.80
30-36 in. Heavy	5.50
9526 Euonymus Fortunei Carrierei —	
Low spreading habit. Excellent ground cover. Produces pinkish orange fruits abundantly.	
1 gal.	1.25
18-24 in.	3.80
9534 Pyracantha Coccinea Lalandi —	
Vigorous grower. Dark glossy evergreen leaves. White flowers followed by orange berries.	
1 gal.	1.25
3 gal.	3.00
5 gal.	4.25
9536 Pyracantha Coccinea Pauciflora —	
Hardest Pyracantha. Compact rounded formal habit.	
1 gal.	1.25
3 gal.	3.35
9533 Stranvaesia Davidiana —	
Semi-upright, graceful habit. Long narrow evergreen leaves.	
5 gal.	4.75
9538 Viburnum Burkwoodi —	
Gardenia scented snowball type blooms. Glossy semi-evergreen leaves.	
1 gal.	1.50
30-36 in.	4.25

Pastures Figure High In Farm Income

Improved pasture on highly valuable land is now accepted as an important crop for increasing farm income. Revenues of \$110.00 to \$125.00 per acre from beef and up to \$250.00 per acre from dairy products have been demonstrated in many sections of Utah and Idaho.

In the crop rotation program, pasture is indispensable for maintenance of soil fertility and increasing production of alternate crops. Deep rooted grasses such as Orchard, Brome and Alta Fescue planted with adaptable clovers or Alfalfa replace great quantities of humus deep in the soil while the legume plants increase the supply of nitrogen and soil bacteria.
